EDUCATION

University of Wisconsin **Madison, WI** **Sept 2010 - Dec 2014**

- B.A. in Computer Science. (GPA: 3.74/4.0)
- B.A. in Economics with Honors. (GPA: 3.85/4.0)
- B.A. in Mathematics. (GPA: 3.81/4.0)
- Recipient of 2013 Honors Summer Sophomore Research Apprenticeship
- Recipient of 2012 Meek Bishop Scholarship in Economics, *top 2 out of 500 economics major students*

WORK EXPERIENCE

Software Engineer **IBM** **August 2015 – Present**
DB2 LUW federation team

- Construct Hive & Impala wrappers to support federation database between traditional RDBMS and Hadoop-based data warehouse solution
- Create automated setup tools that reduce product configuration time by 75%
- Enhance server option optimization tools to reduce federation database performance tuning time by 90 % and enable the capability of tuning the product against Hive, Impala, and Spark
- Resolve over 20 defects, including a severe memory leak issue that impacted a $1.6 million deal. *Awarded IBM Manager's Choice Award 2016*

Research Assistant **UW-Madison** **May 2013 – April 2014**

- Applied Spatial Gaussian Process & Dirichlet Process on fMRI data and improved power of testing on predicting Dementia based upon pixel value of the scan by 5 %

Research Assistant **UW-Madison** **September 2012 – May 2013**

- Used Support Vector Machine technique to examine the impact of Feedback on children's learning outcomes
- Examined the statistical correlation between fMRI data and DTI data in measuring the brain activity of children during their learning process
- Created a data extraction & formatting toolkit in Python that can finish the processing of over 600 MB experimental data within 10 seconds

PROJECT

- **Watson Introspector** (2016), a cognitive tool built in Python on IBM Bluemix for understanding software, answering questions, and interacting with software architecture and data flows in 3D. *Awarded Second Prize in IBM China Development Laboratory Hackathon.*
- **OptiTimal** (2013), an android application that allows user to log their time usage and generate a simple statistical report that characterizes their time management style.
- **Checker** (2012), an AI engine developed in Java for checker game with alpha-beta pruning search algorithm, depth-first iterative deepening method.
- **Malloc** (2011), a memory allocator for the heap of a user-level process in C.

LANGUAGES AND TECHNOLOGIES

- C++; C; Java; Shell; Python; SQL; MATLAB; R; STATA
- DB2; Eclipse; ClearCase; *nix; Emacs; Vi; Maven; Hadoop; Hive; Impala; Sqoop2; Spark
